

STATMES SPC

Advanced Manufacturing Quality Suite

STATMES SPC is an automated manufacturing quality intelligence platform revolutionizes quality control. It seamlessly performs CPK, and PPK analyses for real-time process monitoring and compliance. With automated reporting, it boosts efficiency, accelerates decisions, and scales easily across production lines—helping manufacturers cut costs, lower defects, and maintain top-tier quality.

Modern UX

Experience a user interface designed for simplicity and efficiency. **STATMES SPC** offers a modern, Windows-based web application that feels familiar yet powerful, enabling teams to navigate complex quality data with ease.

Global adoption

Join a global network of manufacturers who rely on **STATMES SPC** to maintain consistent quality standards. From automotive to industrial sectors, our solution is proven across diverse environments, ensuring reliability and compliance wherever your operations are located.

Instant access

Getting started has never been simpler. **STATMES SPC** is available on Amazon Marketplace, allowing you to secure your license instantly and deploy without lengthy procurement processes. Scale effortlessly across multiple sites and start improving process capability today.

Core features

CPK & PPK analysis

Accurately calculate process capability indices to monitor stability and meet industry standards.

Quality

Guarantee consistent product quality and fulfill stakeholder requirements through precise, automated analysis.

Performance

Achieve a narrow process width that is perfectly centered within specification limits, reducing variability and defects.

Benefits

Instant quality insights

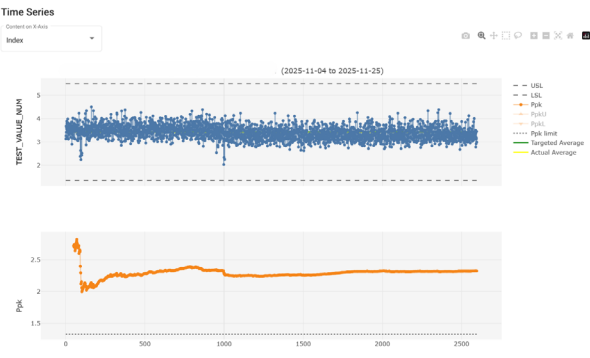

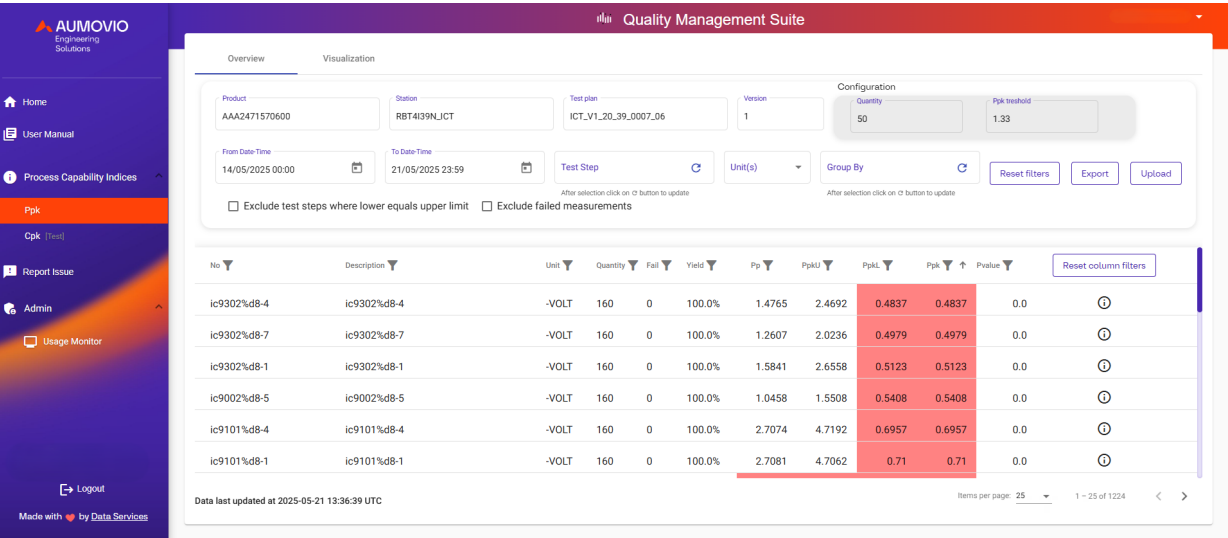

Automated CPK calculations eliminate manual effort and provide immediate visibility into process stability.

Time savings

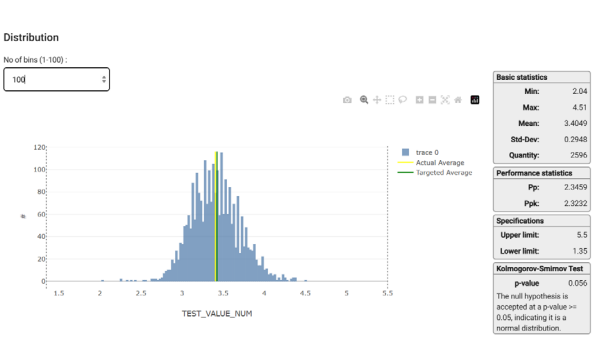

Replaces over 400+ hours annually per plant previously spent on manual reporting—now done in seconds.

Scalable & easy to deploy

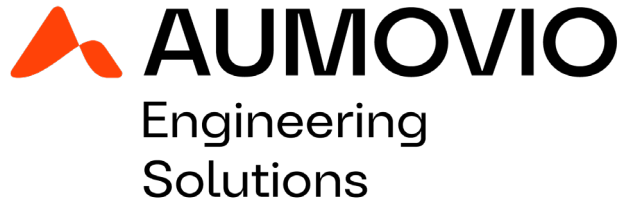

Minimal setup required, making it ideal for rapid rollout across multiple sites.

Sample Visualization of measurement readings and Calculated PPK

Sample visualization of measurement distribution
